

Dear sirs,
XM radio is by far the evolution of radio. I choose the content and when,
instead of having to listen to ad after ad and then finally what I want.
Whether it be wather or news or music.

I strongly urge that the NAB petition 04-160 be rejected. If they want me back
as a listner they will have to one up XM fair and square. I vote with my dollor
as do millions of americans. I'll gladly pay for a subscription service (yes we
pay for XM like cable or internet) so I have the right to variety and choice.

I can;t even believe this is an issue that the NAB can even impose.

Thank You
